I am in the US Navy and I travel to Florida on a weekly basis to see my family. This service provided by XM is one that I need. I don't want to listen to hours upon hours of music and commercials just to get caught in traffic. We also use it to plan our convoys in-conus. This is a great tool. I don't understand why we pay for this service it now is on the verge of being controled??? I pay for this not advertisers!
